

ISSUES & THREATS IN TREE AND FOREST HEALTH CARE

NOVEMBER 7-8, 2017

This biannual course focuses upon critical components of tree & forest health care in Southern landscapes. In-depth topics taught by senior instructors include biotic threats from emerging and important pests, and abiotic stress issues associated with drought and soil constraints. CEU, certification, and registration credits will be available.

This course is for arborists, foresters, tree health care providers, urban/community foresters, landscape architects, landscape managers, nursery managers and others responsible for tree health care. New and experienced professionals will benefit from attending.

The lead instructor for this course is Dr. Kim Coder, professor of tree biology & health care in the Warnell School at UGA.

LOCATION

Flinchum's Phoenix, 650 Phoenix Road, Athens, Georgia

Come to Athens this fall for information, education, and credits for your professional development!
